# A BRIEF HISTORY

## 1986 ESTABLISHED

Our history dates back to 1970s, when our founders worked in the footwear and medicine businesses. In 1986, The Agrawal's ventured into the hardware and furniture industry with handles made in Aligarh and Delhi, and Collins India was born.

## 1993 EXPANSION

In 1993, Collins designed and manufactured its very own line of handles for the first time and introduced the range at a furniture trade fair in Mumbai. The creative satisfaction and quality control transpired into business because gradually, Collins started growing beyond the borders of Mumbai.

## 1998 PAN INDIA PRESENCE

By 1998, Collins India was the official distributor for several European handle companies in India, including Siro and Linea Cali. Collins merchandise was visible with retailers across India, crossing over 300 sales points.

## 2004 ACS

Within a few years after establishing a pan India presence, Collins merchandise was being exported to more than 15 countries via its Dubai office. Along with the global expansion, the Company took its first step towards glass and furniture hardware accessories under the brand ACS.

## 2012 COLLINS CLASS

2012 saw the introduction of the Collins Class product line at the same furniture trade fair in Mumbai, which went on to shape the trends in designer hardware in India for the next decade.

## 2018 WARDROBES

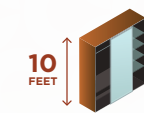

Having an experience in the modular industry for 30 years and international associations, Collins advanced into the retail of modular wardrobes with its Flagship store in Mumbai. The Company believes that the complete solutions business will help us in keeping face with the ever changing lands scape of the furniture industry.

# BENEFITS OF COLLINS WARDROBES

### | Termite Resistant

Wood Panels undergo a special treatment making them termite resistant.

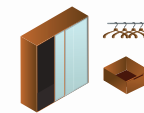

### | Optimal utilisation of space

Can go up to a height of 10 feet, unlike other wardrobes that only go up to 7-8 feet in height.

### | Environment-Friendly

Our panels are non-toxic and free of VOC.

### | Built just for you

Customization to suit your comfort and personal requirements.

### | Non-flammable

30%-40% more fire-resistant over regular ply.

### | Compliant to EN 14323

Conform to the European Standard EN 14323 on melamine surface properties.

### | German Engineering

100% German hardware and components, manufactured using German machines, creating a masterpiece.

### | Re-assemble

You can now take your furniture with you, when you move. This is because our wardrobes are demountable & can be re-assembled and moved to your new home.

### | Water & Damage Resistant

2mm thick edge binding is used to make the wardrobes water and damage resistant.

### | Weather Proof

We use wooden panels that do not breathe with the weather. This means they do not expand and contract with the weather.

### | Thick Panels

Manufactured in 25mm thick wood, giving strength and stability to the wardrobes.

### | Contemporary Designs

Our wardrobe designs and finishes are made keeping the latest trends in mind.

### | Anti-Warpage

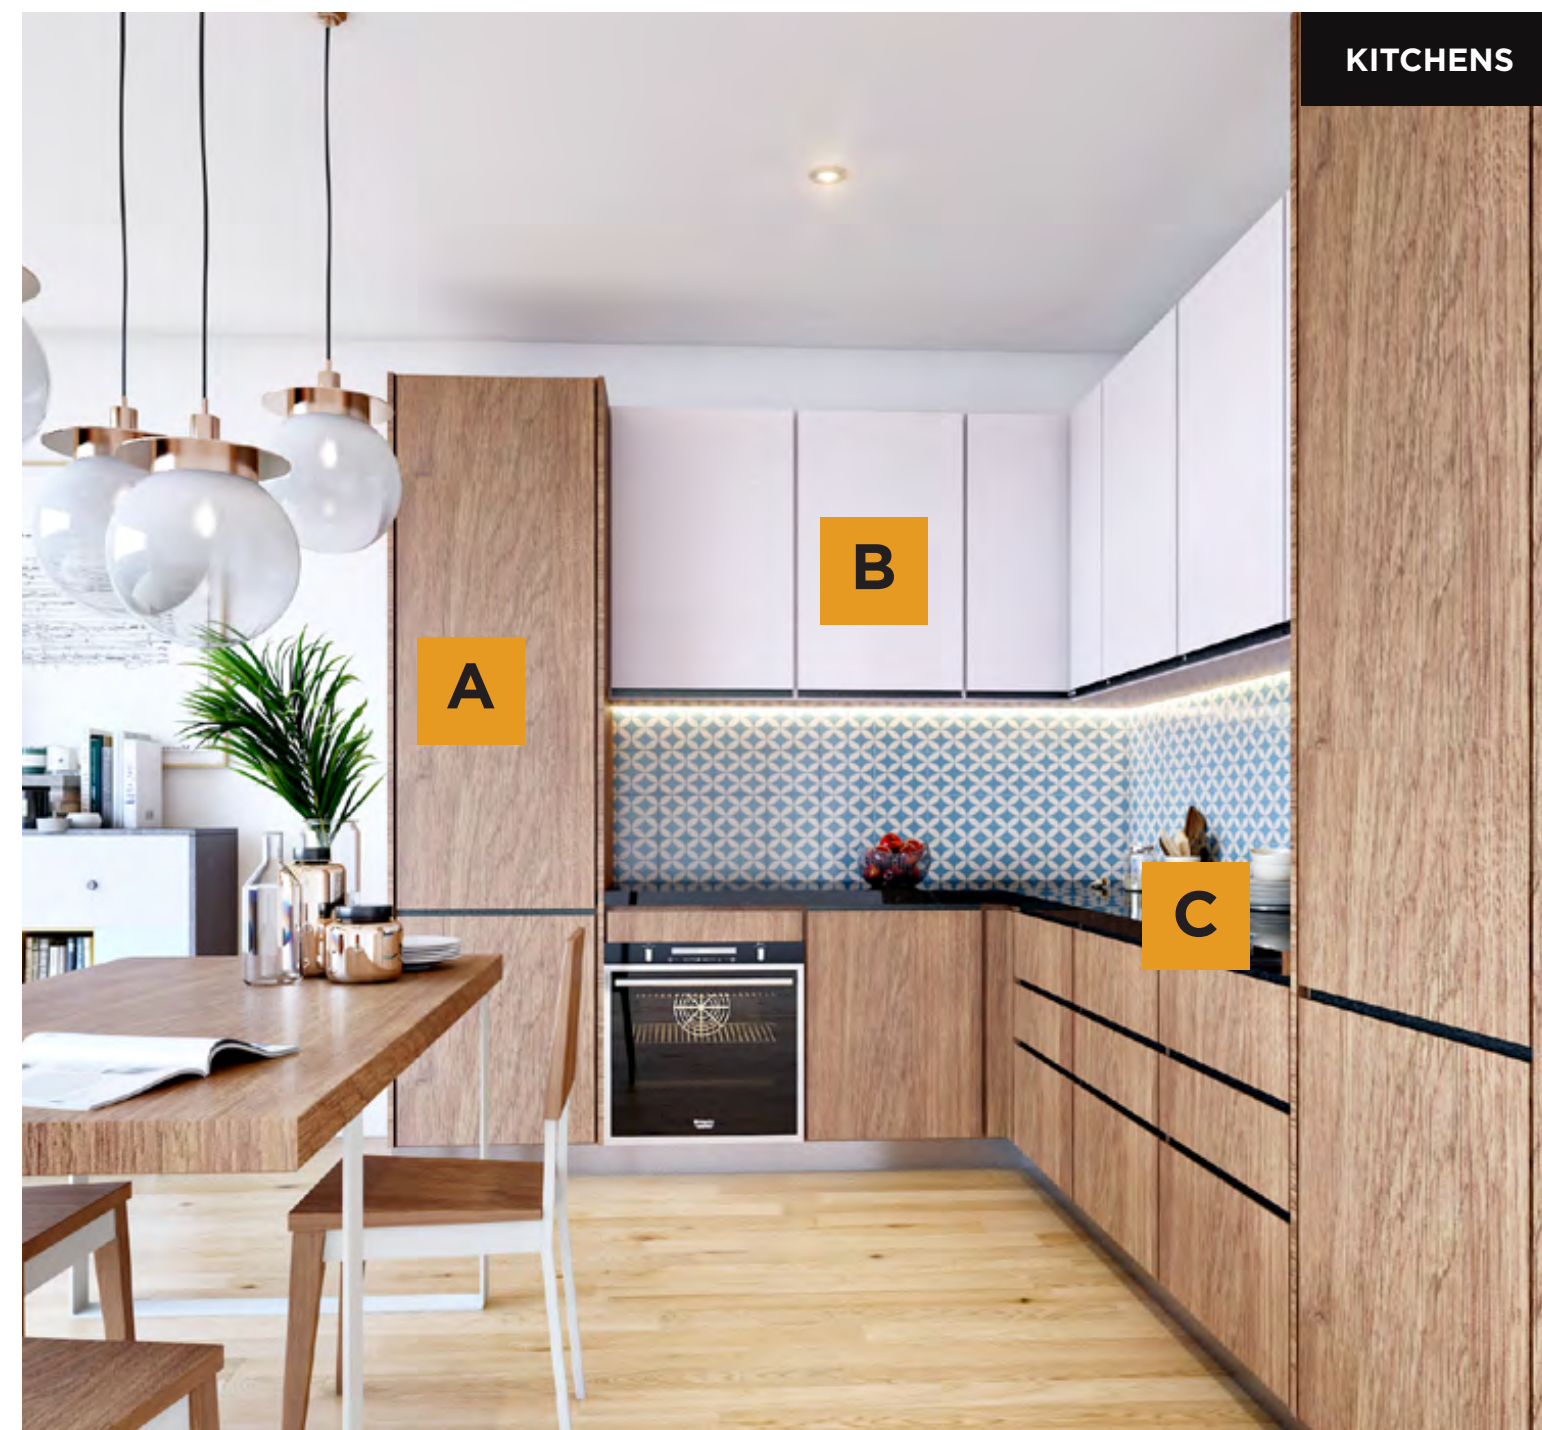

Designed to ensure there is no bending, ensuring that the panels stay flat.

### | Warranty

All our wardrobes come with a 7 year warranty

# KITCHENS

KITCHENS

## PRIMO + BELLA

A chic apartment with an open kitchen and a table where a family shares their meals, their day, and their lives reverberating with laughter and joy. A perfect imagery of familial bliss against the backdrop of a perfect kitchen.

A

In this design, a simple matt teak finish from our Primo range adorns the base units and the tall units

B

The homely essence of teak is contrasted with the elegance of wall cabinets that are done up in White PollyGloss Board from the Bella range

C

The black quartz countertop continues the design synergy with the black handle-less concept used through the kitchen

## PHANTOM

The Penta range of kitchens is our neoclassical dedication to the art and architecture of classical antiquity.

**A**

For this kitchen, we have used the verde colour from our phantom range as the primary colour

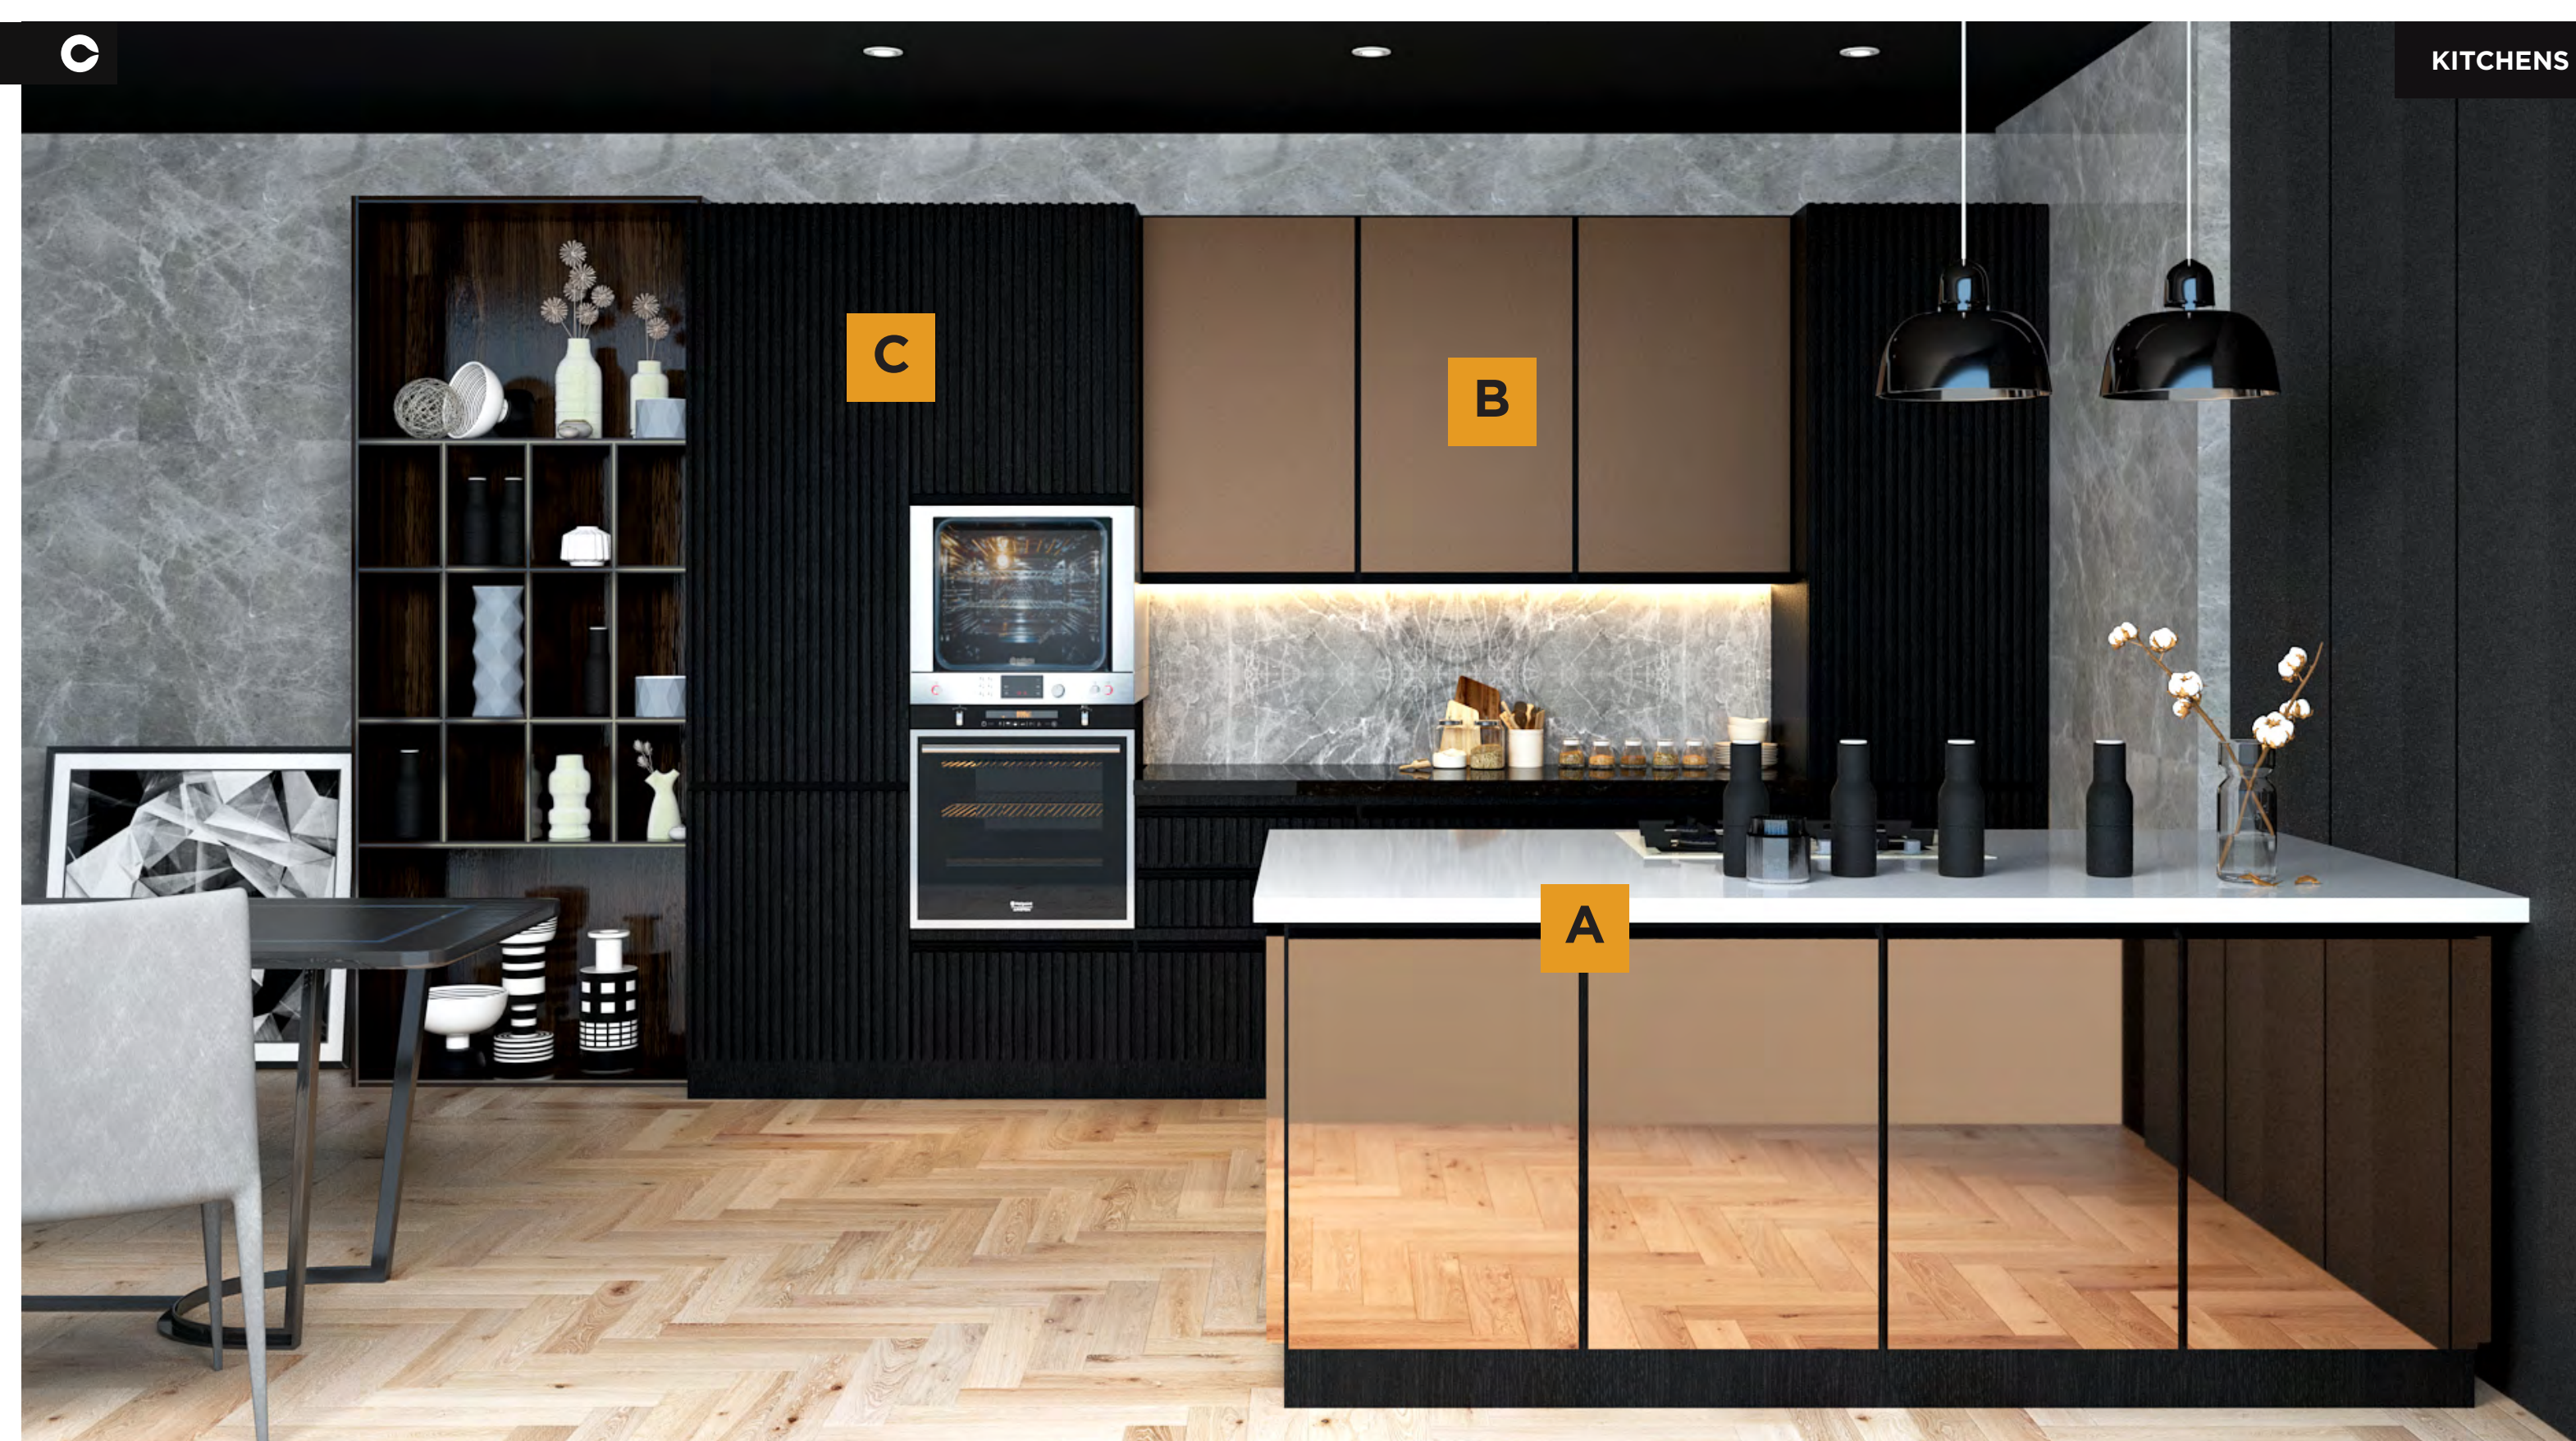

**B**

With a matte green anti-scratch surface beautifully contrasted with a back-splash of subway tiles in white and a countertop in white quartz

**C**

As the light enters this space, it highlights the elements in teak that have been intelligently incorporated in the overhead cabinets to deliver a visual break

## AMAZE + ELEMENTARY

Looking for that crown jewel in a contemporary themed home? We have a stunning black and rose gold kitchen to deliver just that mesmerizing effect!

**A**

The island unit that doubles as a breakfast counter is designed with a reflective rose gold mirror and framed with the Amaze range of profiles

**B**

Continuing the design synergy on the wall shutters, we have used a rose gold mirror albeit in a non-reflective finish

**C**

The real impact of this regal kitchen is created from the use of fluted black material on the tall unit and the wall units from the elementary range

## NATURE

Do you love understated elegance that makes a striking statement through its simplicity? Here is a kitchen from our Nature program that will appeal to your aesthetic sensibility. Often used in combination with other programs from Collins, this kitchen is a perfect example of clean design and optimum functionality.

**A**

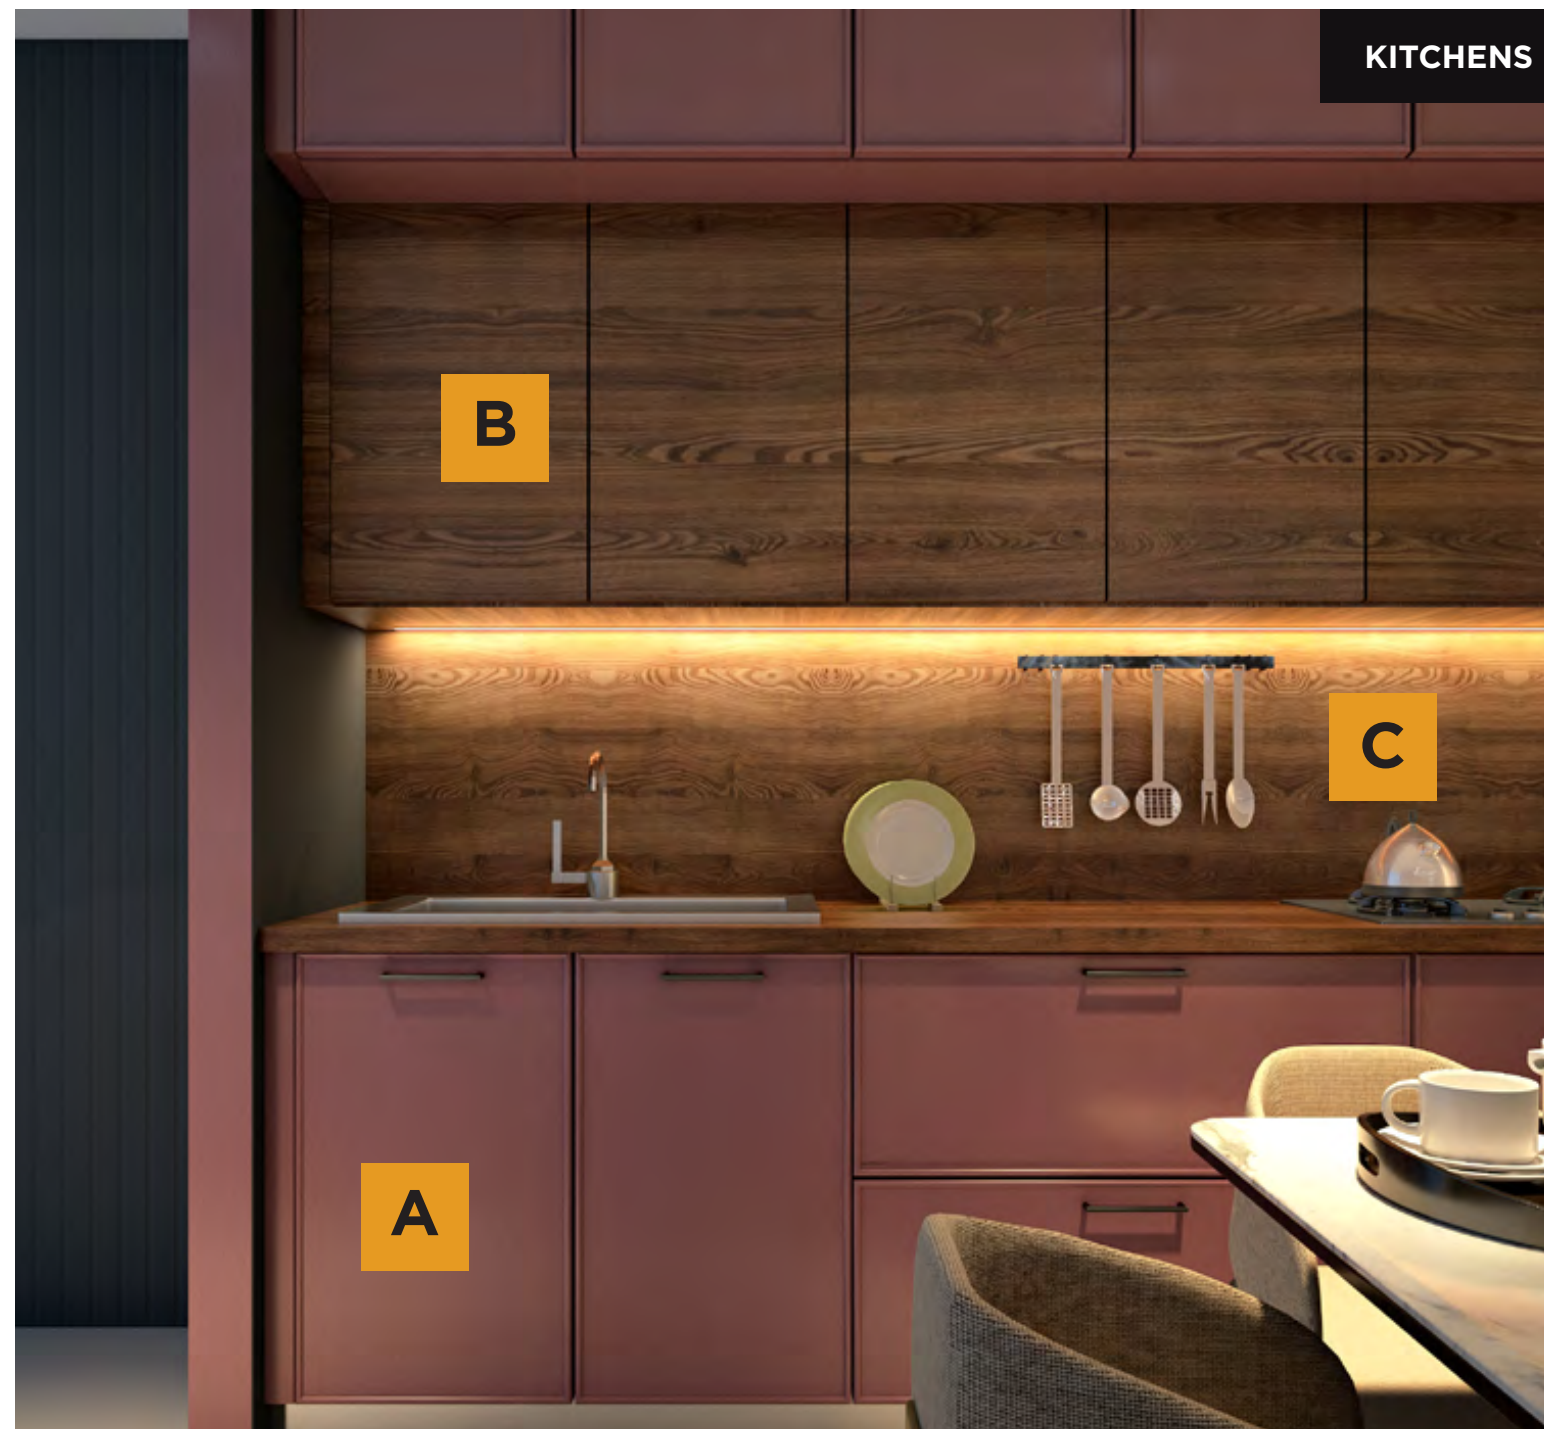

The island unit that doubles as a breakfast counter is designed with a reflective rose gold mirror and framed with the Amaze range of profiles

**B**

Continuing the design synergy on the wall shutters, we have used a rose gold mirror albeit in a non-reflective finish

**C**

The real impact of this regal kitchen is created from the use of fluted black material on the tall unit and the wall units from the elementary range

## ELEMENTARY

We present to you a kitchen that is a perfect blend of cozy aesthetic inspired by nature and a tinge of colour to give it a perfect visual break

**A**

The stunning shade of pink used in the wall units and the base units is from the Elementary Collection which has a library of over 40 colours!

**B**

The loft is beautifully done with a veneer finish from the Vento collection

**C**

The backsplash uses glass with a veneer finish to blend with the loft symmetry

# WARDROBES

## ELEMENTARY

Using a quirky teal colour palette in your room and need a wardrobe to complement that vibe? Look no further!

Elementary is a wardrobe solution that is deliverable in thousands of colours to match nearly any mood board one can design. Customisation through patterns like grooves and lines is possible making it a highly sought-after product for customers who seek uniqueness in every decor element.

## LUSTRE

A virtually rim-less system, the Lustre sliding door creates a clean, minimalist look.

We like to design this one with a single piece of glass in a 9×6 feet height which nicely shows of the panel finish in the frame.

## SCHEME

Did you know that the simplest trick in the design book to create a towering impact in a space is to use unusually elevated furniture? That is precisely the offering on the table with the Scheme Wardrobe collection.

Against the standard height of 2400mm, the wardrobes in this collection can extend up to 2700mm that allows you to optimise wall space while creating a prominent effect. Usually paired with see-through material for its doors, this product is skilfully adaptable to be used as a wardrobe, cutlery unit or even a show cabinet!

## FLUENTO

The most enjoyable element about Fluento is the well defined graphite profiles used to make the sliding door system.

Each door that can go upto the size of 9.5 feet in height, 5 feet in width adds an extra touch of elegance to your bedroom.

Be inspired by the exclusive glass and panel colours to create the perfect, space saving wardrobe.

## MILANO

Step into luxury where space and design blend to create the Collins Walk-In Closets.

Milano is a contemporary take on a walk in space, where there are no doors. This program can be paired with a synchronised sliding partition, which acts as a room divider.

Add carpets, rugs, chairs, cushions, islands, mold it into the favorite corner of your house.

## BELLA

Looking for a wardrobe that will sit well with your decor mood down to the last shade while being super easy to maintain? Your search ends with Bella.

Available in plenty of colours, the wardrobe comprises polygloss fronts giving a smooth sheen aesthetic to the wardrobe. Because of its finish, this wardrobe is easy to clean and maintain in pristine conditions at all times. It's the perfect wardrobe solution, especially for kids' rooms!

## NATURE+GLAZE

The Glaze + Nature wardrobe combines see through glass with wooden textures, two natural allies to create the dream closet for any person with a shoe obsession.

The idea behind the see through shutters is to show off your enviable collection, and we make the right mix with the conventional swing doors, tinted glass and well planned stacking system.
